English — A2/B1 (technical B1)

SUMMARY

Frontend Developer with 5+ years of experience in building modern web applications using Vue/Nuxt, GraphQL, and Node.js. Skilled in designing and implementing complex logic on the frontend, working both independently and in teams. Focused on performance, clean architecture, and user experience. Open to remote opportunities and passionate about continuous learning and growth.

EXPERIENCE

Web Developer

Freelance

April 2025- present

- Built landing pages, mini-CRMs, and lightweight admin panels
- Full cycle from requirements to deployment (Nuxt + Node + GraphQL)
- Communicated directly with clients and delivered polished UI/UX

Frontend Developer

Secureon

April 2024- April 2025

- Worked as part of a team building a custom CRM for an internet provider
- Used Vue 3, Pinia, Ant Design Vue, Axios
- Implemented key features, integrated APIs, and contributed to component architecture

Web Developer

Product Company

June 2020- April 2024

- Independently developed and maintained several web apps using Vue + Nuxt + Node.js + Hasura
- Implemented GraphQL integration, user authentication, internationalization, and PWA features
- Focused on app optimization and clean, maintainable code
